SUMMARY

Senior Software Engineer with 4+ years designing event-driven backends for FinTech lending and B2B/B2C marketplaces using Go, Python, Kafka, Redis, and SSE on Kubernetes. At Paytm Lending, cut display latency by 60% for 10K+ concurrent sessions and reduced application drop-offs by 22% through session-gated streaming architectures. Specialized in distributed systems and cloud agents (MCP, AWS Strands, Cursor). Proven track record of driving 51.7% higher platform engagement and saving INR 2.47M in annual infra costs.

EXPERIENCE

Paytm

Noida, India

Senior Software Engineer, Lending Platform

Sep 2025 – Present

- Engineered a real-time Go SSE service supporting 10K+ concurrent sessions across 120+ loan stages, cutting agent display latency by 60% and scaling adoption across 15+ engineering teams through technical demos and runbooks.
- Reduced lending application drop-offs by 22% by architecting a session-gated Kafka pipeline in NestJS that streams live customer journey telemetry with automated PII masking across loan APIs.
- Productionized lender–Paytm ReconOps workflows on Argo Workflows with AWS Secrets Manager, S3/DWH integration, and Helm on EKS, eliminating false-green reconciliation runs and manual report processing.
- Built an AI-driven PR Quality Hub utilizing Cursor AI rules and Slack human approvals with QA and engineering leads, establishing automated staging checks that block unsafe production releases.
- Hardened LOC marketplace reliability by implementing custom BRE retries and state handling in Go, backfilled unit/integration tests using Testcontainers Kafka and Go 1.25, and added Kibana failure logging.
- Restored E2E integration testing stability across 5 core lending microservices by standardizing Docker Compose and Jenkins CI/CD pipelines for the wider squad.

IndiaMART Intermesh Limited

Noida, India

Software Engineer

Mar 2022 – Sep 2025

- Spearheaded legacy-to-Go service migration, introducing pgx connection pooling and Redis caching to boost throughput by +40%, reduce P99 latency by 60%, and unlock INR 2.47M in annual infra savings.
- Designed a high-concurrency Kafka and Redis message fan-out architecture delivering real-time notification streams with sub-second latency, driving a 51.7% increase in platform transactions.
- Automated 90% of document extraction tasks by deploying GCP LLM pipelines processing 50K+ files/month, and built a schema-aware NL-to-SQL engine in Python achieving 95% query accuracy.
- Developed a LangGraph lead-scoring workflow processing 8K+ leads/week alongside sales stakeholders, automatically flagging high-risk leads to accelerate response times.

PROJECTS

Agentic Workflow Orchestrator & MCP Hub

Personal, 2025–2026

- Architected a cloud agents framework utilizing Model Context Protocol (MCP) and AWS Strands to safely execute multi-step tool calls, context retrieval, and structured JSON parsing for enterprise backend tasks.

Artolio (Gigsetu) — Hyperlocal Artist Marketplace

Personal, 2025–2026

- Built a full-stack B2C discovery platform leveraging Next.js, Node BFF, Go API, PostgreSQL + PostGIS geo-spatial search, and Supabase Auth/Storage deployed across Vercel and Render.

High-Throughput Event Engine

Personal, 2025

- Architected a concurrent Go worker-pool ingestion service with PostgreSQL batch upserts capable of handling

peak loads of 50K events/sec under strict ACID guarantees.

NL-to-SQL RAG Engine (Hackathon Winner)

Personal, 2025

- Delivered a schema-aware RAG pipeline featuring AST-based SQL validation alongside teammates, accelerating multi-table analytical query speeds by 5x to win first place in competition.

SKILLS

Languages & Frameworks: Go, Python, TypeScript, SQL, JavaScript, React, NestJS

Agentic AI & Tooling: Model Context Protocol (MCP), AWS Strands, Cloud Agents, Cursor, LangGraph, LLMops, RAG Systems, PII Masking Automation

Distributed Systems: Event-Driven Architecture, Apache Kafka, AWS MSK, Redis, ElastiCache, SSE, Pub/Sub, gRPC

Cloud & Platform: Kubernetes, Helm, Argo Workflows, Docker, Jenkins, AWS, GCP, EKS, CI/CD

Data & Observability: PostgreSQL, MySQL, MongoDB, Prometheus, Kibana, Elasticsearch, Testcontainers

EDUCATION

University of Allahabad

Aug 2018 – May 2022

Bachelor of Technology in Computer Science and Engineering | CGPA: 9.22/10

AWARDS AND PUBLICATIONS

- Co-author, Donepudi H. S.; Saxena M.; et al. “A Comprehensive Study on Accident Detection Approaches,” 2022 IEEE DELCON.
- Co-author, Saxena M.; Jha S. K. “An Improved Procedure for Face Mask Detection using CNN,” 2022 IEEE DASA.
- Best Performer of the Year (2023); Employee of the Month (Jan 2025); 6x Best Performer Award recipient.
